## **DETAILED ACTION**

### ***Claim Objections***

Claims 1-16 are objected to because of the following informalities: In claim 1, line 5, the word "One" should read -- one --. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, where applicant acts as his or her own lexicographer to specifically define a term of a claim contrary to its ordinary meaning, the written description must clearly redefine the claim term and set forth the uncommon definition so as to put one reasonably skilled in the art on notice that the applicant intended to so redefine that claim term. *Process Control Corp. v. HydReclaim Corp.*, 190 F.3d 1350, 1357, 52 USPQ2d 1029, 1033 (Fed. Cir. 1999). The term "wings" is used by the claim to mean "appendages driven by a motor to propel the toy through water" (note line 5 of the claim), while the accepted meaning appears to refer to a flying object. The term is indefinite because the specification does not clearly redefine the term.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Grieder.

Regarding claim 1, Grieder teaches a swimming animal-shaped toy comprising a motor (12), one or more frontal appendages (13), one or more rear appendages (18) and the rear appendages being adjustable to control the toy's direction in the water (It should be noted that the claim requires "one or both").

Regarding claim 3, Grieder further teaches two frontal appendages (fig.1).

Regarding claims 4 and 5, Grieder further teaches two rear appendages (fig.1).

### ***Allowable Subject Matter***

Claims 2 and 6-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 18-21 are allowed.

### ***Conclusion***
